This is a semi synthetic lubricant based on carefully selected highly refined base oils. This is a transmission oil with an exceptionally high viscosity index. It exhibits excellent fluidity at low temperatures and ensures a long life of the oil and gears.

APPLICATIONS

This is a special transmission oil with "extreme pressure" properties, specifically composed in order to prevent corrosion on copper alloys. It is applied in modern gear boxes and some rear axles, especially where gear shift problems occur when using thicker oils.

FEATURES

Frictional properties: smooth shift performance
Anti-wear protection: long transmission life
Extended oil life: proven resistance to oil degradation
